

Trak Global Security Solutions - Hardware Options

Vehicle security that covers every use case.

Hardware Options

The Trak Global Security Solution is completely flexible, offering you choice in the security hardware you deploy and install.

Presenting the Hardware Options

Trak S7

Ideal for organisations seeking highly accurate vehicle security monitoring that is fully professionally fitted.

- Live vehicle tracking
- Tamper and geofence alerts
- Detailed event reports – speeding, out of hours and more
- Professionally fitted

Trak Sleeper

Our mini-GPS tracker that enables the benefit of both GPS and base station positioning for stolen vehicle location.

- Ideal for stolen vehicle recovery
- Undetectable by GPS scanners
- Remote GPS activations
- Battery powered
- Waterproof

Trak S5

Our S5 enables 24/7/365 monitoring with the ability to immediately alert the monitoring service to contact you and notify the insurer, police and action recovery. As a result, it's very popular and frequently requested by insurer and financial services partners.

- Live GPS and GSM tracking
- Driver ID Fob – for immediate monitoring service and recovery notification/activation
- Tamper alerts
- Thatcham accredited

TrakGard

Offers smart vehicle immobilisation which automatically activates when ignition is off and is designed for ease of use.

- Automatic vehicle immobilisation
- Relay theft prevention
- Code-free access
- Fail-safe over-ride
